East Mountain Physical Therapy

With licensed physical therapists in each of our clinics and occupational therapists in our Cedar Crest clinic, we direct your plan of care and communicate with your physician as needed. Our team of therapists and licensed assistants work together to provide every patient with quality, hands-on care ... every time you are seen. We continuously assess your progress and modify your treatment plan as needed. Our physical therapy team is led by a physical therapist who creates and oversees every patient's plan of care. Each clinic has experienced physical therapist assistants who progress patients through their treatment plan. We believe this "Team Approach" is very effective in providing quality care. Most of our patients appreciate having a variety of ideas and expertise, and our results show that this approach works well! However, if you prefer to be seen by a specific therapist or assistant each visit, simply let the front desk know, and we will do our best to accommodate you.
